TROPHYLINE BODY ARMOUR SAFETY HARNESS

Every treestand hunter needs a safety harness. The new Trophyline Body Armour Safety Harness represents a revolutionary leap forward for such harnesses. Trophyline Body Armour is both safer and more comfortable for hunters. It features a Decelerator Pack, which significantly reduces the impact of any fall. In fact, with Body Armour, the impact of a fall is reduced by more than 50 percent, meaning you experience a much softer drop. It also features a Suspension Relief Seat (S.R.S.) that greatly minimizes the risk of suspension trauma because your weight is comfortably distributed across the area of the S.R.S. instead of slamming into leg straps that dig painfully into your thighs and groin. Trophyline Body Armour is available in two versions: ArmourLite for hot climates and GadgetExtreme for cooler hunts.

GadgetExtreme (shown) includes four gadget retractors, eight ergonomic pockets on the front and one large storage pocket on the back. For more information, Circle #174, log onto trophylineusa.com or call Trophyline USA at (706) 692-0214.

WAYNE'S WICKED ENTERPRISES MAGIC DUST

Magic Dust from Wayne's Wicked Enterprises is one of the most versatile hunting powders on the market. This scent-free, light-activated powder effectively checks wind direction even with little to no light. Unlike other powders on the market, Magic Dust shows more than just the wind direction two feet in front of the hunter. This powder is visible from the stand all the way to the ground, revealing the direction of thermals. Magic Dust can also mark blood trails for simplified game tracking, measure shooting distances when placed on the ground in small piles and prevent other hunters from mistaking you for game when hung around your stand. An available Activator with built-in UV LED reactivates Magic Dust and makes this hunting powder even more effective. For more information, Circle #144, log onto wayneswicked.com or call (479) 957-5203.

GOLD TIP PERMANENT CREST

New this year from Gold Tip is Permanent Crest, a built-in white crest. No longer will you need to wrap your arrows with vinyl arrow wraps to make them highly visible in flight and beautiful in your quiver. Permanent Crest is built into the shaft using Gold Tip's patented process, is super tough and will not come off under normal use or during re-fletching. Permanent Crest is available in the Expedition Hunter, XT Hunter and Pro Hunter arrows.

AFTERSHOCK MANIAC

The 100-grain Maniac fixed-blade broadhead from AfterShock Archery features precision machining for the ultimate in strength, accuracy and penetration. A one-piece, hardened .040 steel tip and main blade slides into place without the use of tools and reinforces the ferrule for extra toughness. The body is machined from 21st-century aerospace hard-coated alloy to create a devastating broadhead. With the durability of its exclusive ShockLoc Dual-Rail Support and Locking System, the Maniac gives you the ability to punch through the toughest hides, bones and flesh. The Maniac can be shot as a two- or four-blade head by adding or removing .020 stainless-steel bleeder blades. For more information, Circle #194, log onto aftershockarchery.com or call (248) 668-0874.
